## Elections Throughout Minnesota

*Now, more than ever is a time to join MCA. Together we are stronger.*

The 2022 general election will have dramatic and long-lasting impacts on politics in Minnesota. In November, voters will be presented with a situation that only occurs once every 20 years; all 201 members of the Minnesota legislature AND the Governor will be on the ballot. You may see several new names listed on that ballot as the state went through its redistricting process, as it does once every ten years, so the districts that legislators are campaigning for will look quite a bit different than they have in the past. These redrawn districts have resulted in a very large number of retirements as legislators have either decided to seek another office, or they have been paired with another incumbent, or they have just decided that now is the right time to take a step back from politics. Due to these retirements, at least one quarter of the 201 legislators that are sworn in for the 2023 legislative session will be brand new.

This historic turnover presents a great opportunity for individuals to engage with their legislators and help inform them of the issues impacting chiropractic medicine in the state. Now is the time to meet with candidates and establish those relationships so that they know they can turn to you when these issues are presented to them on the House and Senate floor. The Government Relations team is always ready and available to assist in establishing these connections, so please reach out as needed. Decisions made by the Minnesota legislature directly impact the chiropractic profession and the services you provide. Elections matter and the Minnesota Chiropractic Political Action Committee (MCPAC) needs you to act now to make sure our profession and our issues are front and center in the minds of decision makers at

the Capitol.
